# Goals - Lead Score Achieved ⚲

You can configure automation to take place when a contact's lead score increases or decreases to a specific number. Once the score has been reached, the goal is satisfied and the automation will continue.

1. Drag the Lead Score Achieved goal to the canvas.

2. Optional: Double-click the name below the icon to give it a custom name.
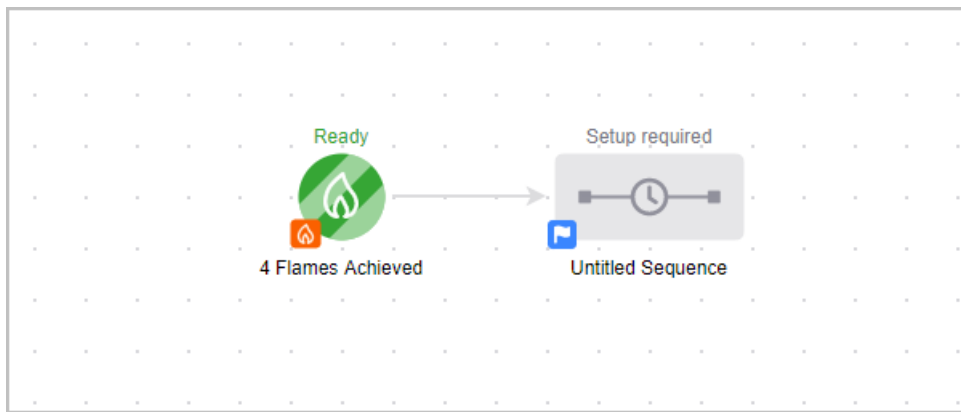

3. Click **Save**

4. Double-click the goal or single click it and choose **View and edit**

5. Configure the number of flames needed to accomplish this goal and send the prospect to the next part of the automation.

6. Connect it to the appropriate sequence

7. Click **Save**

8. You are now ready to publish your changes.
